(3) - The Government will evaluate proposals in accordance with the evaluation criteria set forth below.

PAST PERFORMANCE QUESTIONNAIRES AND TECHNICAL PROPOSAL WORKSHEETS ARE AVAILABLE FOR EDITING AND INCLUSION OR ATTACHMENT.

EVALUATION, NEGOTIATION AND AWARD PROCESS

Proposals will be evaluated and rated to determine which offerors are within a competitive range, price and other factors considered. Award may be made without further negotiations. Proposals should be submitted initially on the most favorable terms that the offeror can submit to the Government, from both price and technical standpoints. However, the Government may, after evaluation of proposals, conduct further oral or written discussions as appropriate, with all offerors whose proposals are within a competitive range. Proposals that do not address one or more criteria or subfactors, may not be considered further for award.

Firms lacking a past performance record (e.g., new firms or those with no relevant experience within their organization) will be treated as an unknown performance risk, receiving a neutral score in this criterion. EVALUATION CRITERIA

The evaluation factors for this contract and their relative importance are listed below. All subfactors within a factor are equal in weight. Technical evaluation factors may be weighted in only one of the following two ways:

- (1) They may be ranked in numerical order of importance, where 1 is most important. Equal rank indicates approximately equal importance; or
 (2) They may be weighted as an approximate percentage of 100%. Method (2) may be used any time, but it must be used if any factor is disproportionately weighted.

All technical evaluation factors (I. below), when combined, are significantly less important than price (II. below).

Award Statement. One award will be made to the offeror (a) whose proposal is technically acceptable and (b) whose technical/price relationship is the most advantageous to the Government. All technical evaluation factors (B-D), when combined, are of equal importance with price (A). The critical factor in making any technical/price trade-off is not the spread between the technical ratings, but rather the significance of that difference. The significance of the spread in ratings will be determined based on what that difference might mean in terms of performance and what it would cost the Government to take advantage of it. Award may not necessarily be made for technical capabilities that would appear to exceed those needed for fulfilling the requirements of this contract.
